

"Cover costs associated with the purchase and installation of on-farm water infrastructure for animal welfare needs and to improve resilience against stock water deficiency."

The Australian and Western Australian governments are working together to deliver \$4.6 million in national rebates to livestock farmers and pastoralists in rural Western Australia for on-farm water infrastructure. The Scheme is available to eligible commercial livestock farmers and pastoralists in rural WA.

FRESH WATER FOR AGRICULTURE

OUR BENEFITS

- ✓ Unlimited water for spraying and stock
- ✓ Climate independent water source
- ✓ Adjustable water quality for variety of farming needs:
 - ✓ Increase in herbicide and pesticide effectiveness
 - ✓ Dramatic reduction in chemical expense
 - ✓ Suitable for all types of crops and animals

OUR CUSTOMISED SOLUTIONS

"The use of a desalination RO reverse osmosis unit has revolutionised our fresh water supply. When we're not using it we stockpile water so we can use a lot of water very quickly. We've had fantastic support. It has been really successful."

KRISTIN LEFROY,
